

TABLE OF CONTENTS

LIST OF TABLES	viii
LIST OF FIGURES	ix
Chapter 1 Introduction	1
1.1 New Physics Searches	1
1.2 Beta Decay	1
1.2.1 Types of Percision Measurements in Beta Decay	1
1.2.2 General Nuclear Matrix Elements for Beta Decay	1
Chapter 2 Fierz Term and ^{20}F	2
2.1 Beta Decay and the Weak Interaction	2
2.2 Matrix elements of Beta Decay	2
2.3 Fierz Term	3
2.4 ^{20}F Decay	4
Chapter 3 Theoretical Description of Beta Decay Spectrum	6
3.1 Parameters to Describe Beta Decay	6
3.2 Phase Space Beta Decay	8
3.2.1 Matrix Elements	10
3.2.1.1 Fierz Term	10
3.3 Variables of Correction Formula	10
3.4 Electromagnetic Corrections and Hardonic Corrections	11
3.4.1 Fermi Function	12
3.4.2 Radiative Correction	13
3.4.2.1 Inner Bremmsstrahlung	14
3.4.3 Screening	16
3.4.3.1 Potentials Used in Screening Derivation	17
3.4.3.2 Screening Correction Formula	19
3.4.4 Finite Mass Correction	19
3.4.5 Finite Size Correction	20
3.4.6 Nuclear Corrections	21
3.4.6.1 The Weak Magnetism	23
Chapter 4 Experimental Description	24
4.1 Experimental technique	24
4.2 Creating ^{20}F Beam	26
4.2.1 Beam Purity	26
4.2.2 Beam Size and Location	26
4.2.2.1 Verifcation of Implant Depth	28
4.3 Detector Configuration	29

4.3.1	^{20}F Decay Detectors	29
4.3.2	Detector Frame	32
4.3.3	Powering the Detectors	32
4.4	Experimental Conditions	33
Chapter 5	Data Processing	35
5.1	Data acquisition	35
5.1.1	Trapezoidal Filter Description	36
5.1.2	Data Acquisition Software	38
5.2	Data Taking and Processing	38
Chapter 6	Half Life Measurement	41
6.1	Motivation	41
6.2	Half life data analysis	42
6.2.1	Data Selection	42
6.2.2	Cut Selection	44
6.3	Systematic Effects	51
6.3.1	Dead Time	51
6.3.2	Pile Up Effects	51
6.3.3	Background	52
	6.3.3.1 Simultaneous vs Seperate Fitting	53
	6.3.3.2 Spectra Arguments	54
6.3.4	Cut Sensitivity	55
6.3.5	Oscillator Stability	55
6.3.6	Binning and Fitting	56
6.4	Result and discussion	56
6.5	Conclusion	57
Chapter 7	GEANT4 Monte Carlo	59
7.1	GEANT4 Monte Carlo	59
7.1.1	Detector Geometry	59
	7.1.1.1 Spacers in Implant Detector	61
7.1.2	Source Definition	62
7.1.3	Primary Particle Definitions	63
7.2	Particle Propagation	65
7.3	MC Output	65
7.4	Simulation Development	66
Chapter 8	Fitting Beta Spectrum	67
8.1	Simulation Results Processing	67
	8.1.0.1 Detector Resolution	68
	8.1.0.2 Determining Detector Resolution	69
	8.1.0.3 Pile-up Modeling	69
8.2	Fitting Procedure	71
8.2.1	Data Processing	71

8.2.2	Fit Function	71
8.2.3	Determining Offset for Shape Fit	72
8.2.4	Fit method characterization	73
8.2.5	Fit details	74
8.2.6	Systematic effects	74
Chapter 9	Conclusion	75
9.1	Discussion of Results	75
9.2	Results Compared to Other Measurements	75
9.3	Further Refinements to Technique	75
BIBLIOGRAPHY	76
